ABOUT ME

Final-year Computer Science and Engineering student and Junior ITSM Consultant at Timestamp, with a strong interest in IT Operations Management, observability, and enterprise IT systems. Motivated by complex technical challenges and the development of scalable solutions that improve operational performance, service visibility, and business efficiency. In my current role, I am building hands-on expertise in IT Discovery, Configuration Management, and Application Performance Monitoring, using enterprise platforms such as OpenText UCMDB, Universal Discovery, and Cisco AppDynamics. With a background spanning software development and consulting, I aim to bridge technical implementation with business objectives, helping organizations improve system reliability, operational insight, and service delivery.

WORK EXPERIENCE

ANALYST DEVELOPER - FRONTEND DEVELOPER – PETROTEC – 01/07/2024 – 31/07/2024 – SEIXAL, PORTUGAL

Business or Sector: Manufacturing | **Department:** Systems Development | **Website:** <https://www.petrotec.com/>

Key Technologies:

- Vue.js
- Vuex Store
- Bootstrap & Bootstrap Vue
- Node.js
- REST APIs

Main Activities and Responsibilities:

- Front-End Development: Created responsive and intuitive user interfaces using Bootstrap Vue.
- State Management: Implemented Vuex Store to centralize and manage the application's state, ensuring a well-organized and efficient architecture.
- Node.js Application Development: Developed a One-Time Password (OTP) system for the configurator's login logic using Node.js.

JUNIOR ITSM CONSULTANT – TIMESTAMP – 01/09/2025 – Current – LISBON, PORTUGAL

Business or Sector: Information and communication | **Department:** ITSM | **Website:** <https://www.timestampgroup.com/>

Key Technologies:

- OpenText UCMDB
- OpenText Universal Discovery (UD)
- Cisco AppDynamics
- OpenText SMAX
- OpenText Operations Orchestration (OO)
- ITSM / ITOM Tools
- ETL & Workflow Automation Tools

Main Responsibilities:

- Support IT Service Management (ITSM) initiatives as a Junior Consultant, focusing on IT Discovery and Application Performance Management (APM) within enterprise environments.
- Contribute to IT Operations Management (ITOM) and observability projects using OpenText UCMDB and Universal Discovery to improve infrastructure visibility and service mapping.
- Monitor and analyze application performance using Cisco AppDynamics to identify performance bottlenecks and improve operational efficiency.

- Assist with service mapping and dependency modeling, enabling better understanding of relationships between applications, services, and infrastructure.
- Support workflow automation and data integration initiatives using OpenText SMAX, Operations Orchestration, and ETL tools to enhance service integration and operational processes.

● EDUCATION AND TRAINING

2022 – CURRENT Setúbal, Portugal

BACHELOR'S DEGREE IN COMPUTER SCIENCE AND ENGINEERING Instituto Politécnico de Setúbal

Developed a strong foundation in programming, database modeling, and software design patterns. Built essential skills in designing efficient, modular solutions and gained practical experience applying industry best practices. Continuously strengthening proficiency in core development tools, with a focus on contributing effectively to collaborative, team-based projects.
